

**PHOTOGRAPHIC INFORMATION**    **Photographer's Name:** (The person who presses the shutter)

**Camera make & model:** Try and give as much information as possible including lens focal lengths (e.g. Canon 6D with 24-105 mm zoom lens).

**Camera Height:** Distance from the ground to the middle of the camera lens. Use a tape measure.

**How has the site been marked?** Rock cairn usually, but also say if the site has not been marked at all.

**Notes on weather conditions:** Sunny, rainy, cloudy, hot, cold, windy, etc.

Frame or IMG No.	Lens FL	Exposure (Speed)	f-stop	Compass bearing (°)	Time
This is the image number from the camera  Remember: Shoot in <b>RAW</b>	<b>24 mm</b> (I always shoot the 1 <sup>st</sup> image as a wide angle – just to make sure that I get everything in)	If you are in a rush then this information can be obtained later	This can be obtained later	<u>Main view</u> (this should/will be a wider view of the original image since you are shooting at 24 mm)	This information can be obtained later but make sure that you have the camera clock set properly
	Match to the original focal length (which is likely to be around 50 mm in most cases)			<u>Main view</u> (shoot at very slightly wider than the original to make sure that you get everything in)	
	24 mm			-30° left (your tripod should have markings to enable you to do this easily.	
	24 mm			-60° left	
	24 mm			-90° left	
	24 mm			+30° left	
	24 mm			+60° left	
	24 mm			+90° left	
	?Other			?Record	
	Tripod 1	No need to record this	No need to record this	No need to record this	No need to record this
	Tripod 2	No need to record this	No need to record	No need to record this	No need to record this

The information in the table provides a general guideline for the number of photographs that you need to take at a site. If you need to take more then do so. It is important to remember to take a photograph of the tripod position. One picture should be of the tripod's position in the general location (e.g. from about 5-10 metres away) while the second photograph of the trip is of the position of the legs and is from a few metres away only.
